

Are your
Wireless Mics
ready?

Act now to receive your rebate

RYGID AV Special Offer

By 2020, if you have wireless microphones operating in the “600 MHz Band” you will be required by law to stop using them, regardless of manufacturer. Rebates are available now until April 30, 2018 for up to \$500 per channel. This may be your only chance to receive a rebate.

600 MHZ WIRELESS REBATE

Due to the FCC Incentive Auction, the use of wireless microphones and personal monitor systems in the 600 MHz Band eventually will be **prohibited by law**. The “600 MHz Band” refers to frequency ranges 616–653 MHz and 663–698 MHz.

If you use wireless systems that operate in the 600 MHz Band, then you should plan to transition to another range of spectrum.

The Shure 600 MHz Wireless Rebate allows you to trade in your eligible system for a rebate with the purchase of a new system. This rebate offer is available for purchases made from April 17, 2017, until April 30, 2018. *Information by Shure, Inc.*
